

EXPERIENCE

- **ING** September 2022 - Present
Data Scientists *Amsterdam, Netherlands*
 - **Churn Prediction:** Designing a churn prediction system for evaluating the likelihood of customers leaving ING services.
- **Philips** January 2022 - July 2022
AI for Language Research Intern *Eindhoven, Netherlands*
 - **Log Data Modeling for Maintenance:** Developed transformer based natural language models for log data generated by medical devices for down stream predictive maintenance and diagnostic tasks. The models were developed using AllenNLP and Pytorch.
 - **Philips Intern Committee Board Member:** Facilitated social and career events for the intern community at Philips.
- **VU Amsterdam** November 2021 - July 2022
Research Assistant *Amsterdam, Netherlands*
 - **AI for Bioinformatics:** Developed data pipelines to feed deep learning transformer based model for the task of epitope prediction. The model was developed using Pytorch.
- **OneByte** September 2019 - December 2021
Data Scientist *Remote Work*
 - **Patient Report Data Extraction and Classification:** Developed end-to-end data extraction and classification models for identifying actionable findings and organ-specific abnormalities in patient screening and monitoring systems. The models accomplished this task through entity linking, entity extraction and entity recognition, and were developed using Spacy.
 - **Medical Procedure Mapper:** Developed a natural language model to map medical procedure names from different hospitals to a standardized lexicon.
 - **Model Assessments:** Implemented custom pipeline for model assessment by domain experts. The pipeline also included monitoring system that provides an overview of expert feedback and progress.
 - **Tagmoo (Cattle ID System):** Developed a system for muzzle print identification of cattle using computer vision and few shot learning.
- **Paitoo** February 2019 - September 2019
Machine Learning Engineer *Lahore, Pakistan*
 - **Recommendation Engine:** Developed a recommendation engine for food centered social media app (Paitoo).
 - **Classification System:** Developed a hierarchical image classification model to automatically classify dishes in Paitoo database.
 - **Ranking Optimization:** Developed, tested and maintained a system to identify and rank trending restaurants and items within the app.
 - **Data Analysis:** Provided data driven insights about user behavior.
- **DataLog - CodeNConsult** May 2018 - September 2018
Computer Engineer Internee *Karachi, Pakistan*

EDUCATION

- **Masters in Artificial Intelligence** August 2020 – July 2022
VU Amsterdam *Amsterdam, Netherlands*
 - **Research Assistant:** Exploring deep learning strategies for effective knowledge transfer in epitope prediction.
- **Bachelors of Science in Computer Engineering** August 2014 – June 2019
Middle East Technical University *North Cyprus, Turkey*

PROJECTS AND PUBLICATIONS

- **Auto-Encoder Knowledge Extraction for Anomaly Detection Task:** Knowledge extraction from auto-encoders on anomaly detection tasks using co-activation graphs (ACM K-CAP conference 2021).
- **Boolean Logic Ensemble Method:** Hierarchical categories with a novel boolean logic ensemble classifier to overcome dataset limitations.
- **Graduation Project (CID):** Modular self-driving system for use in virtual environments.

SKILLS

- **Proficient with:** Python - SkLearn - OpenCV - Pandas - TensorFlow - Git - Pytorch - Elastic Search - Linux - Pytoch - Spacy - AllenNLP
- **Have Knowledge of:** C++ - IoT Technology - C# - Azure - AWS - GCP - SQL

SELECTED COURSEWORK

- | | |
|---|---|
| • Machine Learning | • BioInformatics |
| • Artificial Intelligence | • Multi-Agent Systems |
| • Experimental Design and Data Analysis | • Data Mining |
| • Knowledge Representation | • NLP Technologies |
| • Socially Intelligent Robotics | • Machine Learning and Reasoning for Healthcare |
| • Evolutionary Computing | |
